Art Unit: 2839

#### **DETAILED ACTION**

#### **Drawings**

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the means for measuring temperature must be shown or the feature(s) canceled from the claim 5. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 7-9 are rejected under 35 U.S.C. 101 because they include both method and apparatus claims.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Blew et al. (5651081).

Blew (Figures 1-6) shows a cable 10 having a conductive core 16 and an optical fiber 12 placed on the conductive core and located longitudinally in an interstice of the cable. The cable is used in a circuit located in a duct or in an overhead transmission.

# Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blew et al. (5651081).

Blew shows all the features of these claims except a means to measure the temperature of the optical fiber. A means to measure temperature is common knowledge and widely used in commercial and industrial applications. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide such a means to Blew's cable because this would provide a means to determine the temperature of the fiber as is well known.

Art Unit: 2839

#### Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mullin et al. (4852965) also reads on most of the claims.

## **Contact Information**

8. Any correspondence to this action may be mailed to:

Commissioner for Patents Post Office Box 1450 Alexandria, VA 22313-1450

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chandrika Prasad whose telephone number is (571) 272-2099.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor can be reached at (571) 272-2800 ext 39. The fax number is (703) 872-9306.
